BRS 300

The BRS 300 is the mobile version of the BRS 500 model and incorporates the 10 most frequently used programs of the BRS 500. The BRS 300 was designed as a lightweight, portable model as it is battery operated, that can easily be used by a person in their workplace, a frequent traveler or the professional athlete. Being slightly smaller in size and more flexible than the BRS 500, this applicator mat can be applied easily in a sitting position.

The applicator mat doubles as a carry bag for the unit. When zipped up, the mat holds all other BRS300 components and becomes a very important travel or work companion.

The mat and a smaller round pad can be plugged in and operated at the same time, giving a single application field that is the equivalent size of the whole body.

The BRS300 control unit also has its own coil system built in and can therefore be used by itself to provide a treatment.

Programme Selection:

Prog.	Effects	Application
1	sleep prep.	- sleep disorder; nervousness
2	relaxation	- bronchitis, migraines, sinusitis
3	regeneration	- high blood pressure, inflammation, sciatica
4	anti stress	- headache
5	vitality	- rheumatism
6	activity	- allergies
7	perseverance	- deg. disease of the skeleton
8	regeneration	- osteoporosis, intervertebral disks,
9	energy	- arthritis, fractures, low blood pressure
10	circulation	- improve blood circulation

Components:

- A battery operated Control Unit with a choice of 10 programs.
- A fully flexible applicator mat, 430mm wide and 800mm long, to lie on, sit on, or cover the torso.
- A 240 mm diameter round pad for localized applications, i.e. knee, elbow
- Battery re-charger.
