

# PULSE8

The building blocks of all living creatures is the individual cell.  
The cells are the **POWER PLANTS of LIFE!**

The body's own pulsating energy fields supply these miniature power plants with energy (via ion transport) and enhance the cell metabolism. The pulsating frequency supports the natural self healing abilities of the body.

Pulsating energy resonance therapy, using the frequency and intensity of the body's own energy fields assists the body to rebuild energy. The result is greater immunity and an improved healing power that is able to assist with recovery rates.

**BY**  
**MEDEC**

Over 20 years of scientific and medical research at European Universities in Russia and Germany confirms the success of stimulating the biological energy fields. The Pulsating Energy Resonance Therapy, as used in the Pulse8 can be categorised as an advanced form of complementary medicine, combined with the principles of Chinese Acupuncture.

For 5000 years, Chinese philosophy relates the energy levels of the human body to well being, healing and regeneration. We have combined ancient knowledge with the latest space age technology to produce the Medec Pulse8. Numerous studies concerning the therapeutic benefits of Pulsating Energy Therapy have been published.

Larger Medec systems such as the Bioresonance systems (BRS 300 & 500) have been used in Clinics, Rehabilitation Centres, Sports Institutions, Spas and Medical Institutions, demonstrating on a daily basis a very high rate of assistance and recovery of medical conditions. This in turn has led to thousands of systems being sold for use in private homes for preventative medicinal purposes or supporting therapies.

**The Medec Pulse8** combines the best of these medical technologies into one compact wearable system that is very affordable and easy to operate.

The Pulse8 may assist with:

- Helping faster recovery from sporting injuries
- Migraine and headache relief
- Improvement of blood circulation and blood pressure
- Control of menstrual pain
- Relief of arthritic pain in joints and limbs
- Relief of chronic pain
- Improve bone healing

**The Medec Pulse8** is conveniently used for assisting with the treatment of localized problem areas, mobilising and concentrating the body's own healing energy on one localized area.

**Reducing Pain and Aches** - The Medec pulse8 stimulates the cell plasma membrane by means of resonant energy fields. This increases the regenerative power of the effected body system, allowing it to fight injury, stress and disease more effectively.

The Medec pulse8 is a lightweight mobile unit, which can be used at any time or place. Since it can be carried on your person, it is always available for immediate treatment if and when required.

**Research and Development** - The therapeutic effect of PERT in the Medec Pulse8 can make all the difference with assisting in the treatment of sports injuries, pain in joints and ligaments, migraine, stress and blood pressure.

As a general health and preventative measure using the Medec Pulse8 assists with relaxation, improving stamina, creating greater immunity and improving general well being.

#### Programs and their Benefits

- Program 1 – Sleep Preparation
- Program 2 – Relaxation
- Program 3 – Regeneration
- Program 4 – Anti-stress
- Program 5 – Vitality
- Program 6 – Activity
- Program 7 – Endurance
- Program 8 – Regeneration
- Program 9 – Energy

#### Acupuncture Treatment

The Medec pulse8 is an easy and very efficient way for receiving the benefits of acupuncture without the needles! Simply strapping it on to the area of the recommended acupuncture point will gently stimulate and harmonise the connected meridian and it's related organ system.
